Chosen the World Over

Since 1903

TELESCOPE FOLDING FURNITURE has been "Chosen the World Over" since 1903. With the very beginning of its production in that year, campers, tourists, householders and others all over the world showed a preference for it which has continued through the years.

Today, of course, Telescope products are vastly superior to what they were during the first stages of production. No efforts have been spared year by year to improve them in every way possible, including construction, materials and design. Consequently, their popularity has been on the constant increase.

Each Telescope product is stoutly built of choice materials and is mechanically perfect. Every cot and chair will stand rough knockabout camp usage—moisture, corrosion and rigorous climate.

Telescope Production

All Telescope Folding Furniture is manufactured in the large modern "Telescope" plant at Granville, N. Y. Various departments of the plant are shown in the pictures on pages 8, 9, 10, 11 and 12. Equipped throughout with up-to-date machinery, and manned by skilled workmen, it is able to handle the volume of production which the large and wide demand for Telescope products makes necessary. All departments and other

phases of operation are thoroughly coordinated. These various factors of production, of course, are what make possible the superior quality and economical prices of Telescope products.

Packing

Realizing the importance of proper packing, every care is taken when an order is shipped. Telescope products are first thoroughly inspected one by one to make sure that no flaws exist. In this way Telescope Folding Furniture is sure to reach the dealer in the same perfect condition it leaves the plant or warehouse.

Folding Furniture In Colors

To Telescope's line of world-famous folding furniture have been added from time to time various products in pleasing, attractive colors. They are pictured on pages 2 to 7, while the wood finishes and canvas patterns are shown in the color chart on the flap of the front cover.

For months after the introduction of this attractive line, it was impossible to supply the demand. The pleasing blue, yellow, orange and green of these bright models invite the eye and make colorful additions to the home, porch, lawn, roof garden, boat, etc. They are as useful as they are beautiful, offering the utmost in pleasure and relaxation.

Because Telescope Folding Furniture in colors and other Telescope numbers are seasonable in summer, hundreds of dealers are ridding themselves of dull summer months. Telescope Folding Furniture makes profitable summers.

No. 500 SERIES RECLINING CHAIRS

The width of this chair and the full cut seat, combined with other features, make it exceedingly comfortable. It is adjustable to three reclining positions. The design throughout, including the reinforced foot-rest and one piece, shaped arm-rests, has been devised so as to afford the body complete relaxation. The foot-rest, being a wooden one, will provide maximum comfort and wear.

The frame, which is made of specially selected hardwood, is smooth and attractively finished in weatherproofed varnish or apple green or orange lacquer. The individual pieces of wood are securely and neatly fitted and riveted together, making the chair extra strong and sure to give long and satisfactory service. All in all, the workmanship and materials are the best obtainable.

The canvas is of especially fine quality. It will maintain its trim, distinctive appearance in the face of rigorous usage. It comes in four different patterns: No. 1 (Orange and Blue); No. 2 (Green and Yellow); No. 8 (Orange and Lemon); and No. 9 (Red and Gold). These are shown in the color chart on the flap of the front cover.

The sun-shade is detachable and adjustable. Instead of having the old-fashioned fringe, it is scalloped in keeping with modern preferences. This chair folds flat and with ease, because of the pliability of its joints. It may be had with or without sun-shade or foot-rest, as shown in the table below. Packed very securely with ends protected by heavy fibre board to insure delivery in good condition.

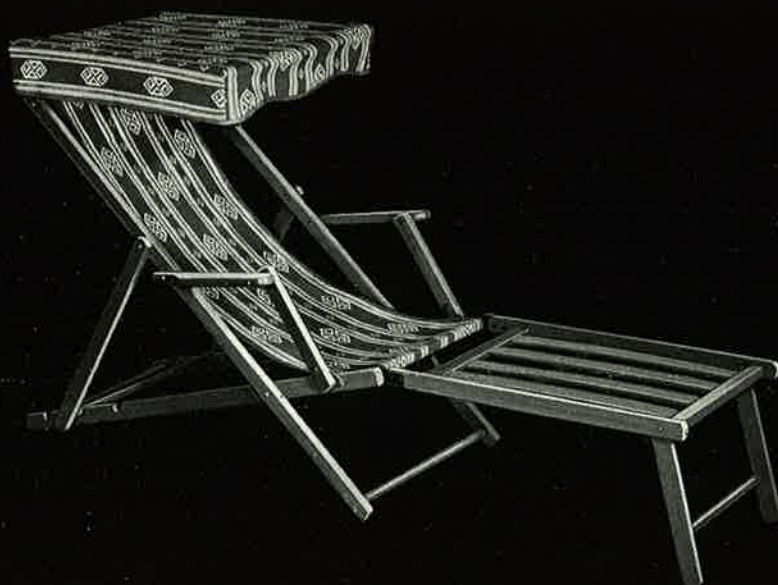

Illustration shows Style No. V-502 FS

No. 500 Series Reclining Chairs

Made in various combinations of canvas patterns and of wood finishes and with or without sun-shade or foot-rest as shown by the following style numbers.

With Foot-Rest With Sun-Shade (Weight about 20 pounds)	No Foot-Rest No Sun-Shade (Weight about 12 pounds)	With Foot-Rest No Sun-Shade (Weight about 17 pounds)	No Foot-Rest With Sun-Shade (Weight about 15 pounds)	Pattern of Canvas*	Finish of Wood*

* See Color Chart on Front Cover Flap for Colors of Wood Finishes and Canvas Patterns.

No. 400 SERIES RECLINING CHAIRS

No other reclining chairs obtainable can compare with this one in combined attractiveness, comfort and durability. With *padded cushion seat, extra back grasp*, full cut canvas seat and also *pillow rest* it is ideal for comfort. These four improved features are marked by arrows in the illustration below. The extra back grasp is very important in that it strengthens the back-rest while adding greatly to its comfort.

This chair is adjustable to three comfortable positions. Especially important is the fact that it is very wide and the canvas seat full cut. The materials and workmanship are particularly fine. Both the hardwood used for the frame and the canvas are specially selected. The frame, sturdily and neatly joined together, is finished in elegant apple green or orange lacquer or weatherproofed varnish.

The foot-rest is wooden throughout and therefore unusually strong and restful. It is detachable and easily kept clean,

because it does not show foot prints or soil, warp or stretch like the old-fashioned canvas kind. The sun-shade, detachable and adjustable, is scalloped in the modern manner. Of superior construction, the arm-rests are solid one piece. They cannot reverse when unfolding chair.

The canvas is exceedingly durable. It comes in the following patterns, shown in the color chart on the flap of the front cover: No. 3 (Solid Green); No. 4 (Solid Tangerine); No. 5 (Woven Stripe); No. 10 (Orange and Green); and No. 11 (Green and Green).

As listed in the table below, this chair in its various wood finishes and canvas patterns, may be had with or without foot-rest or sun-shade. It is packed very securely with ends protected by heavy fibre board to insure delivery in good condition.

No. OL-73 Lacquered Frame Folding Cot

Pattern of Canvas*	Finish of Wood*
No. 3 (Solid Green)	Orange Lacquer

No. 200 Series Reclining Chairs

This popular-priced chair is similar to the No. 500 Series Models described on page 2, except that the foot-rest and arm-rests are eliminated. The same superior materials are used in its construction and the workmanship is in accordance with our regular standards of excellence. It may be had without sun-shade.

Like all other Telescope Reclining Chairs this one is securely built in every detail. The frame is attractively varnished and firmly set together, so that it will give enduring service under hard, constant usage. The canvas is of unusually excellent quality and will wear well under any and all conditions. It comes in four different patterns: No. 1 (Orange and Blue); No. 2 (Green and Yellow); No. 8 (Orange and Lemon); and No. 9 (Red and Gold), as shown in the color chart on the flap of the front cover and as listed below. Packed very securely with ends protected by heavy fibre board to insure delivery in good condition.

No. OL-73

Lacquered Frame Folding Cot

Today's demand is for color in all sorts of products. This colorful cot is in keeping with the new vogue, and at the same time, it is staunchly constructed from the better grade of materials. The hardwood and canvas used are specially selected, and the workmanship is the superior kind which only Telescope craftsmen have been able to attain in cots.

The frame is finished in orange lacquer and covered with solid green (Pattern No. 3) canvas. This cot is ideal for tourists, campers or the home, because it is exceedingly comfortable and durable as well as colorful and attractive. It folds easily and compactly.

DIMENSIONS OF COT

Opened: 76 inches x 25 inches x 18 inches high.

Folded: 37½ inches x 8 inches x 3½ inches.

Weight: about 16 pounds.

Packed and Shipped in Individual Cartons.

No. 90 Beach Back-Rest

This exceedingly comfortable Back-Rest for the beach can be adjusted to various very restful reclining positions. It is easy to adjust and folds flat. The seat and the back are made of brightly striped, exceptionally strong canvas. The canvases supplied are our selection of an assortment from the patterns shown in the color chart on the flap of the front cover. This will enable the buyer to see the various patterns in actual color, the assortment giving him an excellent idea of how they show up on other Telescope products.

The frame is of Northern Hardwood, and attractively and durably finished in **apple green lacquer**. The workmanship throughout is superior, being carefully supervised to make sure that the frame and canvas covering will remain together securely and lastingly.

DIMENSIONS

Opened: 18 inches in width

Weight: about 4 pounds

Style A Child's Play Set

This set was recently designed and produced to meet a wide demand, and has already justified itself in the very popular reception it has received. In its attractive colors, pleasing design and distinctiveness, it is ideal for children. Furthermore, its typically sturdy Telescope construction means that it will stand up under the rigorous usage which children ordinarily give their playthings. It folds compactly and easily.

It consists of a hardwood table, top 24 inches x 15 inches x 18 inches high, with legs finished in orange lacquer and top in apple green lacquer, and two chairs, No. OL-28-3. These chairs come with orange lacquered frame and green canvas seat and slip-over back. Two corners of the table top bear colored pictures of children at play. This set is sold only as a unit, toys in illustration not included. Its weight complete is about 12 pounds. Each set is packed in heavy Kraft paper.

No. 600 Series "Single Action" Flat Folding Rockers

Exceedingly distinctive in appearance, these rocking chairs are thoroughly in accord with the wide vogue of color today. The cheerful colorings of the frame and of the canvas blend together most attractively.

An important feature is the "single action" folding. In one movement, the rockers are easily and quickly folded into a compact unit as shown in the illustration. The height of the arm-rests and back, and the width and depth of the seats have been carefully determined so as to provide maximum comfort. Another factor which contributes to this comfort is the sturdiness of construction.

The frames are evened to perfect smoothness and lacquered in apple green or orange. The care with which they are built by Telescope craftsmen and the fine quality of the hardwood used assure long life. The canvas is the very best obtainable. Apple green lacquered frames may be had with canvas of Green and Yellow (Pattern No. 2), Solid Tangerine (Pattern No. 4), or Green and Green (Pattern No. 11). Orange lacquered frames come with canvas of Orange and Blue (Pattern No. 1), Solid Green (Pattern No. 3), or Orange and Green (Pattern No. 10). This chair weighs about 12 pounds.

No. 700 Series "Single Action" Flat Folding Chairs

This is something new in a folding chair with several exclusive, improved features. It is light in weight, folds easily, folds flat, takes up little room and will not tip.

Of great appeal is the fact that the flat and even base legs make it impossible for the chair to tip backwards. These legs are equipped with nicked gliders to prevent marring or scratching of floors.

The frame is of seasoned hardwood and finished in apple green or orange lacquer. It is exceedingly firm and durable due to the fact that the usual care is exercised in its construction at the "Telescope" plant. The canvas covering, as on all other Telescope products, is of particularly fine quality. It has been carefully selected so as to harmonize properly with the lacquered frames. Canvas of Green and Yellow (Pattern No. 2), Solid Tangerine (Pattern No. 4) or Green and Green (Pattern No. 11) is furnished with the apple green lacquered frames, while that provided with the orange lacquered frames is in Orange and Blue (Pattern No. 1), Solid Green (Pattern No. 3) or Orange and Green (Pattern No. 10). The weight of this chair is about 12 pounds.

No. 55 Series Folding Arm-Chairs

Finished in lively, pleasing colors, these folding arm-chair models are in keeping with the tremendous vogue for color. They fold compactly as shown in the illustration.

Their roominess and stout construction make them exceedingly comfortable. The frame is of seasoned Northern Hardwood, cut with machine precision to the minutest fraction of an inch to prevent wobbling. The feet are rounded and equipped with nickelled gliders to avoid scratching or marring of floors. Metal parts are dipped in enamel.

These chairs come with orange or apple green lacquered frame covered with canvas of various patterns as shown in the table below. They also come with frame finished in weatherproofed varnish and covered with heavy brown duck. In all models, the canvas cover is fastened rigidly to the frame, so that it cannot pull out. The canvas back-rest is strong, but yields comfortably to the body's pressure.

DIMENSIONS

Folded: 25 inches x 17 inches x 9 inches.

Weight: about 12 pounds.

	Pattern of Canvas*	Finish of Wood*
OL-82-3	No. 3 (Solid Green)	Orange Lacquer
GL-82-4	No. 4 (Solid Tangerine)	Apple Green Lacquer

No. L-82 Series Lacquered Frame Folding Chairs

Built with the same sturdiness and from the same superior materials as other Telescope products, these folding chairs will give enduring service under the most trying conditions. The Northern Hardwood and canvas used in their manufacture at the "Telescope" plant are of exceptionally fine quality. The workmanship is thorough in every detail. In their gay-colored attractiveness, the models of this series present a finished appearance that immediately marks them as being made with great care and from superior hardwood and canvas.

The chairs set firmly and evenly on the floor or ground. The seats are wide and roomy. The backs are strong, and yet, yielding to the body. Canvas covers are supplied either in solid tangerine or green, while the frames are finished in apple green or orange lacquer. This chair weighs about 4 pounds.

No. 1 1/2 Military Cot

This military type folding cot is unusually compact. It is ideal for campers' knockabout usage. The frame is of air-dried Northern Hardwood. The neatly enameled metal parts are of open-hearth steel. The cover is of double-filled canvas duck. A convenient carrying handle is attached.

Military Cot No. 1 1/2 is sturdy and comfortable, and will give enduring service in the face of hard wear. It folds compactly and easily. Like all other Telescope cots, it has numerous improved features that make it desirable where comfort and lasting service are required.

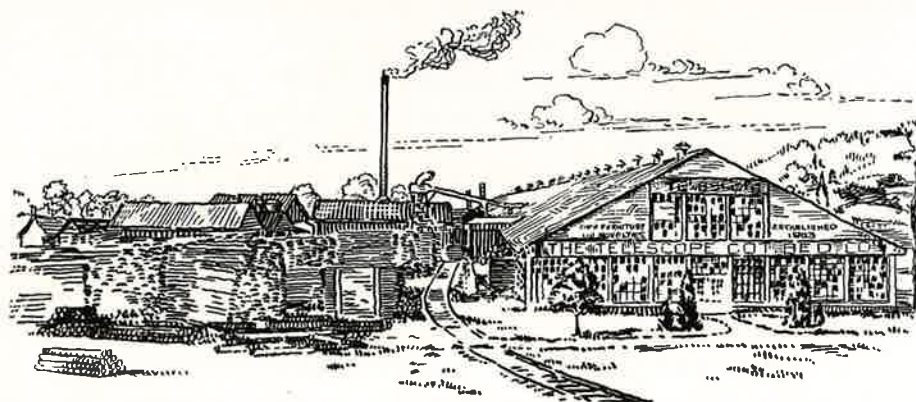

DIMENSIONS

Opened: 76 inches x 25 inches x 18 inches high.

Folded: 37 inches x 6 inches x 4 1/2 inches.

Weight: about 15 1/2 pounds.

Packed and Shipped in Individual Cartons.

A VIEW OF THE MODERNLY EQUIPPED TELESCOPE PLANT AT GRANVILLE, N. Y., WHERE ALL TELESCOPE PRODUCTS ARE MANUFACTURED. INCLUDED IS A SECTION OF THE YARDS USED FOR STORING THE SPECIALLY SELECTED NORTHERN HARDWOOD FROM WHICH THESE PRODUCTS ARE MADE.

No. 9 The Ever-Ready Cot

This cot is versatile in the uses to which it lends itself in camping, motor touring and as an emergency bed around the home.

It has been modified and perfected to meet the exacting requirements of tourists and campers. Opens instantly. **No end pieces to fuss or fumble with.** Light and easy to carry; takes little space. Restful and comfortable. The frame is of Northern Hardwood, seasoned properly. Canvas duck cover is of highest quality double filling construction. Canvas is securely attached and joints of frame are strong and easy working.

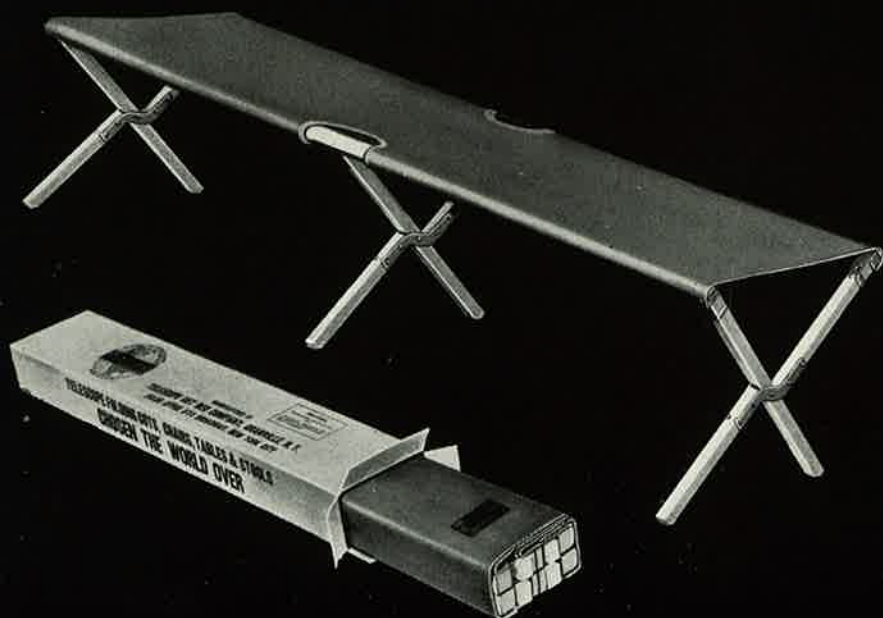

DIMENSIONS

Opened: 76 inches x 27 inches x 18 inches high.

Folded: 38 inches x 7 1/2 inches x 4 inches.

Weight: about 16 1/4 pounds.

Packed and Shipped in Individual Cartons.

No. 12 Travellers Cot

This cot is a splendid one for women and children in camp and emergency use. The frame, which is made of seasoned Northern Hardwood, stands rigidly and firmly.

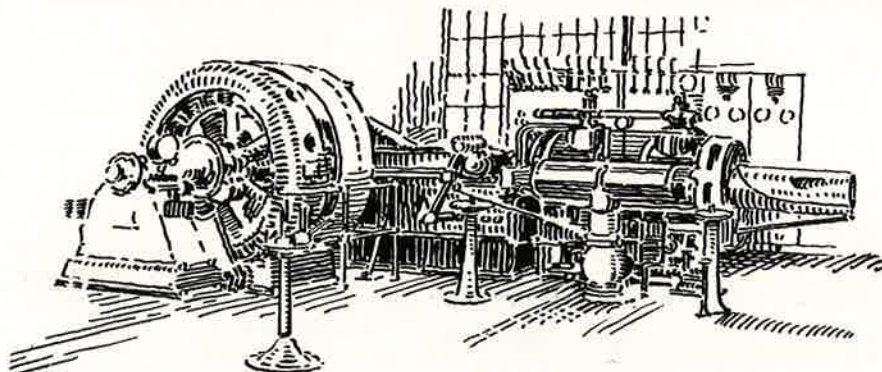

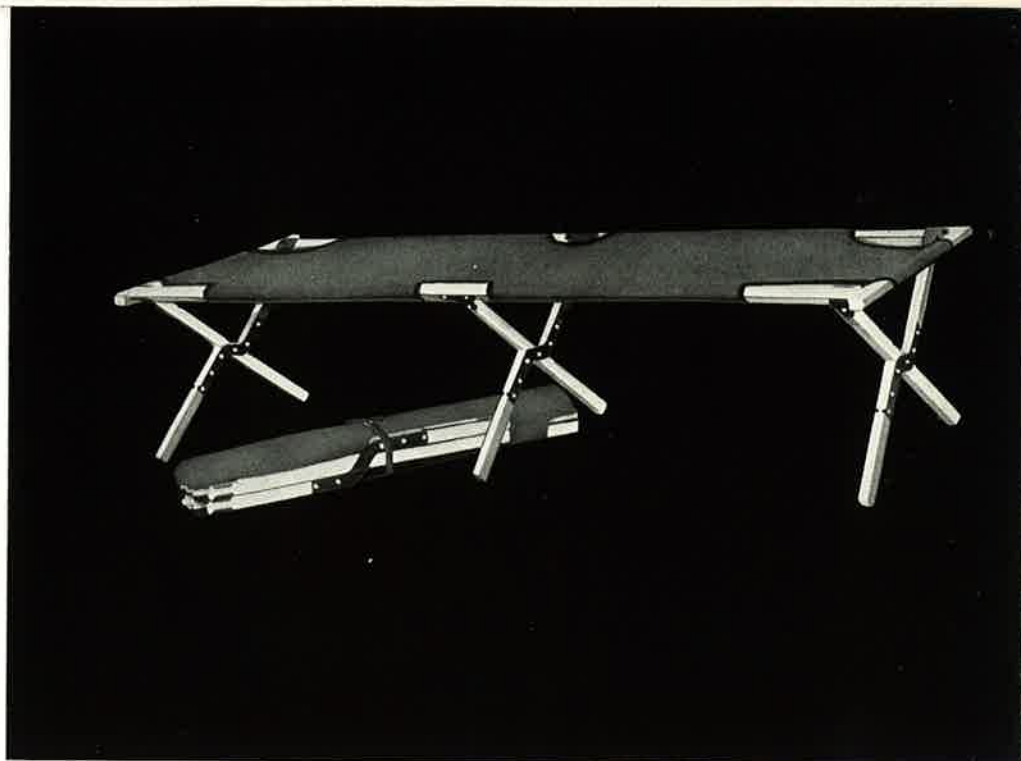

Travellers Cot No. 12 is exceedingly comfortable and will remain so because of its sturdiness. Heavy durable canvas duck of double-filled weave is used for the cover, which is securely and snugly fitted to the frame. All steel parts are enameled.

DIMENSIONS

Opened: 76 inches x 25 inches x 18 inches high.

Folded: 37 inches x 5 $\frac{3}{4}$ inches x 4 $\frac{1}{4}$ inches.

Weight: about 15 pounds.

THE TELESCOPE FACTORY IS COMPLETELY SELF-CONTAINED — EVERY CONCEIVABLE REQUIREMENT FOR THE MANUFACTURE OF TELESCOPE PRODUCTS BEING PROVIDED WITHIN ITS WALLS. THIS VAST ARRAY OF FACILITIES AND EQUIPMENT INCLUDES OUR OWN SPECIAL GENERATING PLANT, A SECTION OF WHICH IS SHOWN ABOVE. WE MAKE ALL OUR LIGHT, HEAT AND POWER. AN EXAMPLE OF THE OPERATING RESOURCEFULNESS WHICH MAKES OUR ECONOMICAL PRODUCTION POSSIBLE IS EMBODIED IN THE FACT THAT EVERY BIT OF SAWDUST AND WASTE TRIMMINGS FROM THE WOODWORKING DEPARTMENT IS UTILIZED AS FUEL IN THE GENERATING PLANT.

No. 4 Bungalow Cot

This cot is similar in construction to Travellers Cot No. 12, pictured and described above, except that it is especially designed for bungalow use.

The wood used for the frame and the double-filled canvas duck used for the cover are specially selected and unquestionably the best obtainable for the purpose. In the "Telescope" plant at Granville, N. Y., skilled workmen fashion and assemble the various parts of the frame and then attach the cover.

DIMENSIONS

Opened: 76 inches x 25 inches x 18 inches high.

Folded: 37 $\frac{1}{2}$ inches x 8 inches x 3 $\frac{1}{2}$ inches.

Weight: about 15 pounds.

No. 1 Army Cot

This cot is identical to Military Cot No. 1½, pictured and described on page 8, except that it has **two extra inches of width**. It is one of the most comfortable cots made, and also unusually compact when folded.

The wood and canvas used in its construction are of the same superior and durable quality as that used in other Telescope cots. The workmanship also is in keeping with Telescope standards.

Army Cot No. 1 recommends itself for use wherever a cot that combines restfulness with sturdiness and durability is required.

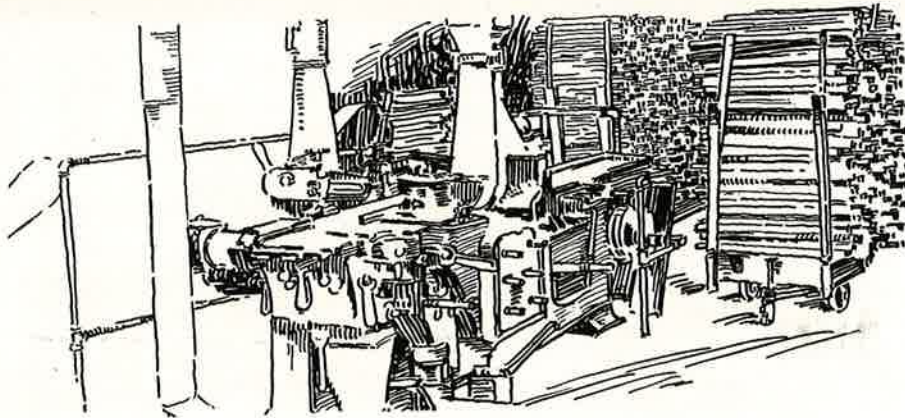

DIMENSIONS

Opened: 76 inches x 27 inches x 18 inches high.

Folded: 37 inches x 6 inches x 4½ inches.

Weight: about 16 pounds.

Packed and Shipped in Individual Cartons.

THIS SCENE REPRESENTS ANOTHER OF THE SEVERAL REASONS FOR THE TRIM AND STURDY APPEARANCE OF TELESCOPE FOLDING FURNITURE. IT SHOWS ONE OF THE MODERN WOODWORKING MACHINES AT OUR PLANT.

No. 5 Child's Cot

Many institutions and schools throughout the country are using this cot. The demand continues to increase steadily. It is ideal for use wherever there are children; in the home as well as in institutions and schools. It is a firmly built, sturdy, restful cot for youngsters.

The frame is of Northern Hardwood and the covering, a double-filled canvas duck of heavy weight. The wood is finished smoothly and all metal parts are neatly enameled. The size of Child's Cot No. 5 is appropriate for children ranging up to 10 years of age.

DIMENSIONS

Opened: 54 inches x 21½ inches x 13½ inches high.

Folded: 26½ inches x 7¾ inches x 4½ inches.

Weight: about 12 pounds.

No. 100 Single Model Standard Telescope Cot Bed

This cot affords the utmost in real comfort. Every detail of the design and construction has been carried out to make it restful. It opens and folds easily, and when folded is unusually compact.

Seasoned Northern Hardwood is used for the frame which is rigidly set together with braces of enameled high-carbon steel. The workmanship throughout is faultless like that in all other Telescope products. The double-filled canvas duck cover is snugly and securely fastened, so that it will not work loose. This makes a strong, rigid support, and yet, yields comfortably to the body's pressure. This is the only cot that automatically adjusts itself to uneven ground and to stretching and shrinking of the canvas.

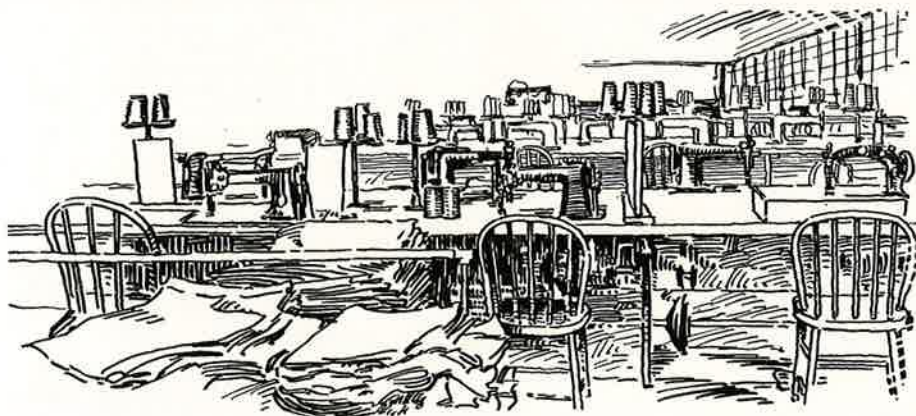

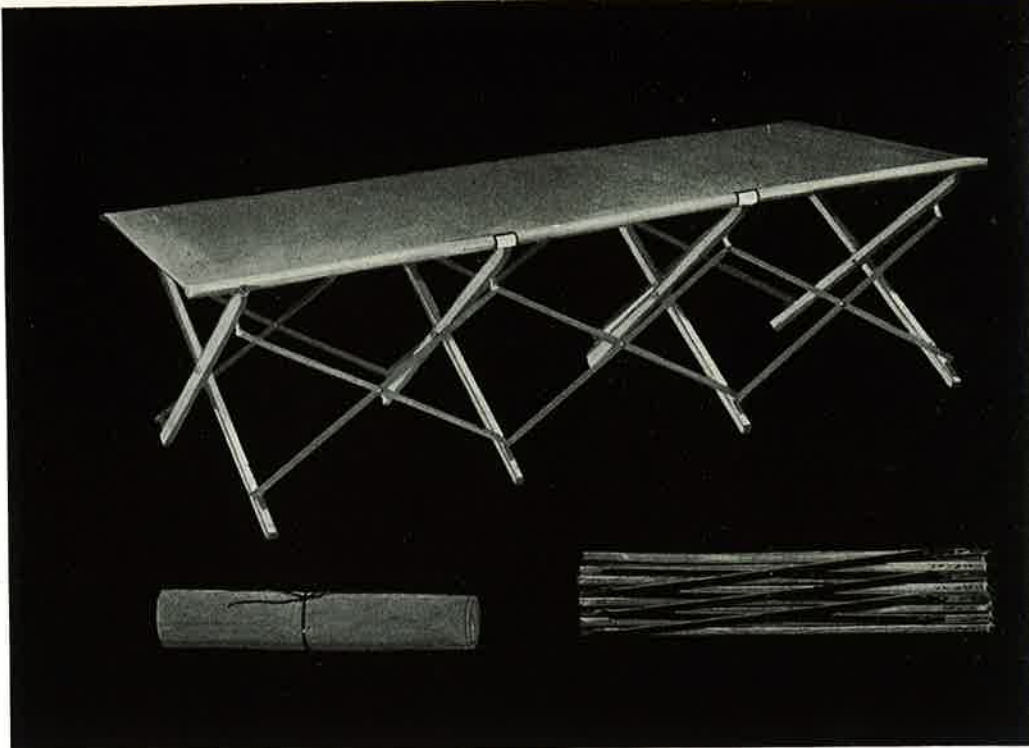

DIMENSIONS

Opened: 76 inches x 27½ inches x 19 inches high.

Folded: 32½ inches x 6 inches x 5 inches.

Weight: about 15½ pounds.

Packed and Shipped in Individual Cartons.

A BATTERY OF SEWING MACHINES AT THE TELESCOPE PLANT. AS WITH ALL OTHER EQUIPMENT USED IN THE MANUFACTURE OF TELESCOPE FOLDING FURNITURE, THE SEWING MACHINES ARE OF THE LATEST AND MOST EFFICIENT DESIGN.

No. 101 Double Model Standard Telescope Cot Bed

This cot is similar to Single Model No. 100, pictured and described above, except that it is wide enough to accommodate two people. It is the largest when opened and the smallest when folded.

The materials and workmanship are of the same high quality, and every detail of design and construction is carried out with view to furnishing comfort. The frame is particularly sturdy, as is very necessary in a cot of this size. It will not wobble and sets firmly and evenly on irregular ground.

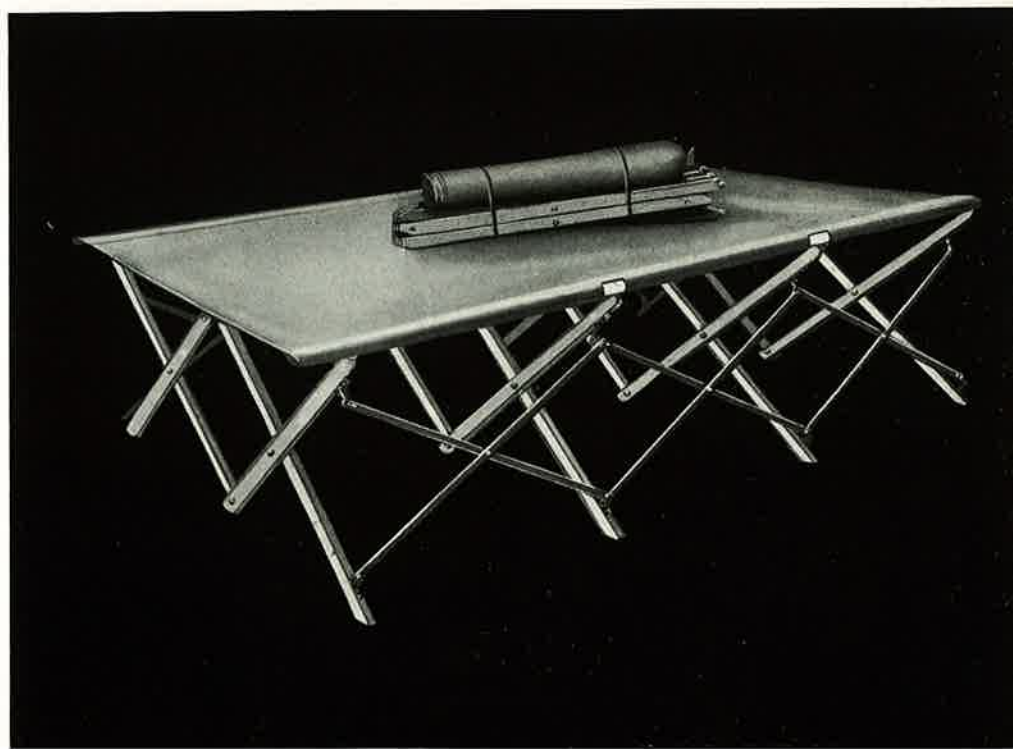

DIMENSIONS

Opened: 76 inches x 48 inches x 20 inches high.

Folded: 32 inches x 9½ inches x 8 inches.

Weight: about 23½ pounds.

Packed and Shipped in Individual Cartons.

No. 6 Regulation Cot U. S. Army Field Type

Made strictly in accordance with U. S. Master specifications, this cot is designed especially to give service that combines durability and comfort. It is exceptionally sturdy in every detail and will give enduring, excellent service in the face of constantly rough usage.

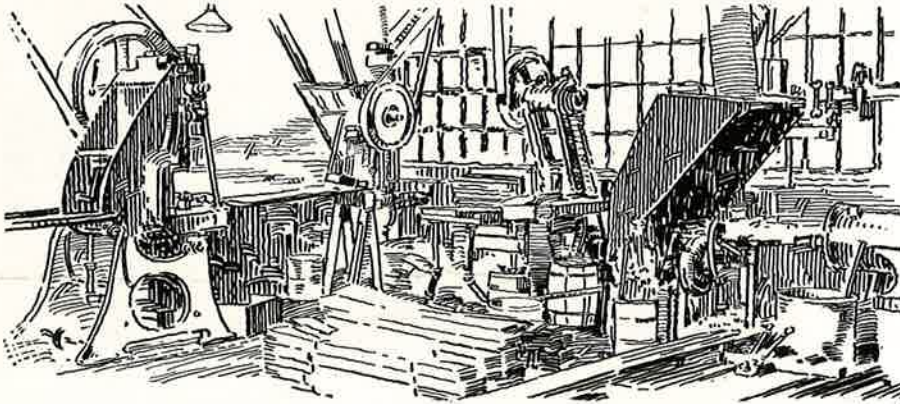

The Northern Hardwood frame is extra heavy and is dipped in a wood preservative, which not only preserves the wood but also prevents warping. It is covered with No. 8 (18 oz.) canvas, which is capable of withstanding the most rigorous wear. This canvas cover is removable and can be scrubbed and cleaned. Metal parts are of open-hearth, hot-rolled steel, and neatly finished in baked enamel.

DIMENSIONS

Opened: 78 inches x 27 inches x 17 inches high.

Folded: 38 inches x 7½ inches x 6 inches.

Weight: about 22 pounds.

ANOTHER SCENE WITHIN THE LARGE, MODERN TELESCOPE PLANT AT GRANVILLE, N. Y., WHERE ALL TELESCOPE PRODUCTS ARE MANUFACTURED. IT SHOWS A SECTION OF THE METAL STAMPING DEPARTMENT.

No. 77 Dreadnaught Steel Cot

This cot folds to the unusually compact width of three inches. Its all-steel lacquered frame is of strong high-carbon steel tubing.

A particularly attractive feature is the ease with which it opens and folds. It can be taken down in a jiffy and folded to a compact unit. The excellent workmanship in combination with the superior quality of the steel used for the frame, means that Dreadnaught Steel Cot No. 77 sets staunchly on the floor or ground. Ends of legs are rounded to prevent scratching of floors. The double-filled canvas duck cover fits the frame snugly and is firmly attached so that it cannot work loose.

DIMENSIONS

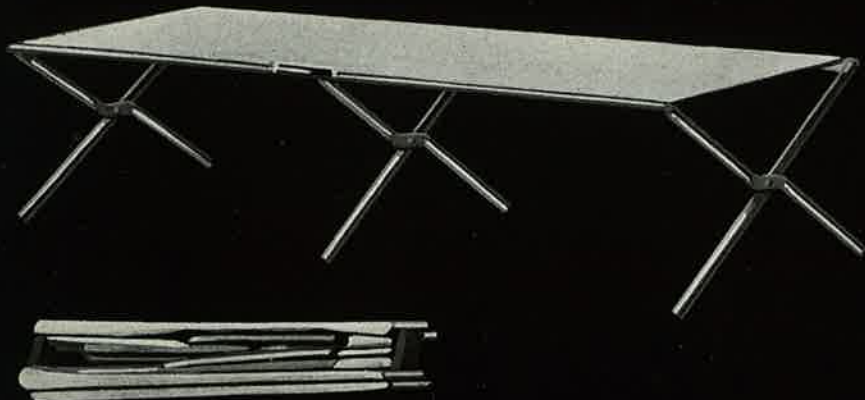

Opened: 76 inches x 26 inches x 16¾ inches high.

Folded: 38 inches x 6½ inches x 3 inches.

Weight: about 18½ pounds.

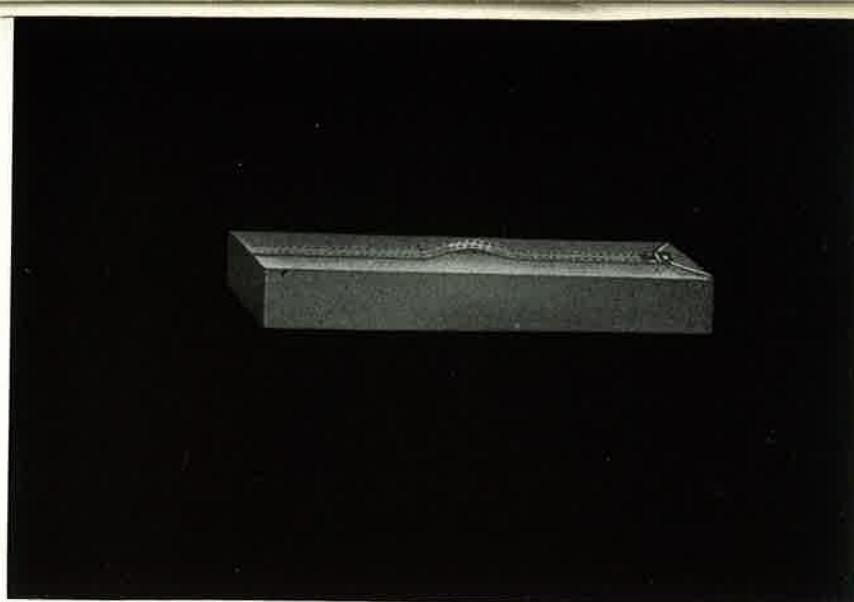

Packed and Shipped in Individual Cartons.

Page Twelve

Carrying Bags for Cots

These are exceptionally handy bags for anyone owning a cot. Heavy canvas duck in combination with splendid workmanship makes them very strong and durable. Each bag is fitted with a convenient carrying handle, and also equipped with a Japanned Buckle Fastener. Especially designed for the convenience of campers and tourists, these bags will also help to keep cots clean. The weight is about three-quarters of a pound.

No. OL-28-3 Child's Chair

This colored chair is pictured and described on page 5 as part of the **Child's Play Set**. It is identical in size and construction to Automobile Chair No. 28, pictured and described on page 15. The frame comes in orange lacquer finish, covered with solid green canvas of Pattern No. 3. It is ideal for use in the home as well as in institutions and schools. This chair weighs about 3 pounds.

Mosquito Canopy and Bar Frames

Telescope Bar Frames are made both in wood (natural finish) and in steel tubing (heavily enameled). They are quickly and easily attachable, remain in position firmly, and fit snugly. Made with the utmost care at the "Telescope" plant and from materials of splendid quality, they are bound to provide lastingly satisfactory service.

The Mosquito Canopy is of fine, closely woven mesh, especially adapted to folding cots. The corners are reinforced with sewed-on cloth, still further adding to the wearability of the netting.

No. 53 Folding Arm-Chair

Finished in attractive, weatherproofed varnish and covered with heavy brown canvas, this chair is identical to No. 55 Series Folding (colored) Arm-Chairs (described and pictured on page 7), in construction, except that wooden parts are lathe turned.

It is stoutly constructed, roomy and comfortable. The canvas seat cannot pull out, because of the secureness with which it is fastened to the frame. Though exceedingly strong, the canvas back-rest yields comfortably to the body's pressure.

DIMENSIONS

Folded: 26 inches x 17½ inches x 8½ inches.
Weight: about 14½ pounds.

No. 82 Folding Chair

This is a light but very stoutly constructed camp chair, made from specially selected Northern Hardwood. The frame is in natural finish. The seat is of heavy striped canvas duck in an assortment of patterns as represented in the Telescope line. The assortment, which is our selection, will enable the buyer to see the various patterns in actual colors and will give him an excellent idea of how they show up on other Telescope products. This colorful canvas, a new feature in Folding Chair No. 82, adds greatly, of course, to its appeal. Because of its lightness in weight and compactness in folding, this chair is easily stored and carried.

DIMENSIONS

Folded: 21 inches x 15¾ inches x 3½ inches.
Weight: about 3½ pounds.

No. 60 Premier Folding Chair

Designed to withstand particularly hard wear, this folding chair is extra strong in all details of its construction.

The back-rest of the Northern Hardwood frame is doubly riveted and the cross legs reinforced with open-hearth, neatly enameled steel braces. The canvas seat is tightly and firmly attached to the supports of the frame. While strong enough to maintain its rigidity permanently, it yields comfortably to the body's pressure. Furnished with brown canvas seats.

DIMENSIONS

Folded: 22 inches x 16¼ inches x 3¾ inches.
Weight: about 4 pounds.

No. 50 Premier Folding Stool

No. 50 stool is identical to Premier Folding Chair No. 60, pictured and described on the opposite page, except that it has no back-rest. It is likewise specially designed to withstand hard wear, and is sturdy in every detail of its construction.

Because of its stoutness and durability, this stool is ideal for the use of children, as well as for any and all other uses about the home or camp. The natural, clean finish of the wood, the excellent quality of the canvas and the superiority of the workmanship combine to make it exceedingly trim and attractive in appearance. Brown canvas is used for the seat.

DIMENSIONS

Folded: 22 inches x 15 inches x 3 inches.

Weight: about 3¼ pounds.

No. 72 Folding Stool

An extremely handy stool, this one is similar in every way to Folding Chair No. 82, pictured and described on the opposite page, except that the back-rest has been eliminated. Though light, it is very stoutly constructed throughout. The seat is of heavy canvas duck, supplied in our selection of an assortment from the patterns shown in the color chart on the flap of the front cover.

DIMENSIONS

Folded: 21 inches x 13 inches
x 2½ inches.

Weight: about 2½ pounds.

No. 28 Automobile Chair

This chair is especially designed to fit into automobiles as an extra seat. While small enough to meet this requirement, it is very comfortable. At the same time, it folds compactly.

It is stoutly constructed in every detail. The heavy canvas used for the seat is now supplied in an assortment of attractive patterns, as shown in the color chart on the flap of the front cover. This assortment, which is our selection, will enable the buyer to see the various patterns in actual color and will give him an excellent idea of how they show up on other Telescope products.

Strong enough to support adult weight easily. No. 28 is also used extensively as a play chair for juveniles.

DIMENSIONS

Folded: 15 inches x 14½ inches x 3½ inches.

Weight: about 2¾ pounds.

No. 40

Folding Hammock Chair

(HIGH BACK HEAD-RESTING STYLE)

This makes a comfortable rest chair. It is easily carried and folds up like an umbrella. The reclining seat is made of fine quality green and yellow striped canvas. The corners, at points of greatest strain, are doubly reinforced.

DIMENSIONS

Folded: 42 inches x 5 inches x 3 inches.
Weight: about 6¾ pounds.

No. 30

Folding Hammock Chair

Made exactly the same as Model No. 40, pictured and described above, except that the reclining seat is approximately 8 inches shorter and the covering is of green and white woven awning stripe.

DIMENSIONS

Folded: 35 inches x 5 inches x 3 inches.
Weight: about 6 pounds.

No. 8

Folding Camp Table Roll-Top

A fine camping table, compact and useful. Its principal feature is its roll-top of wooden slats, which roll up just like a Roll-Top office desk. With legs folded and top rolled up, this table makes a compact unit.

Solid and strong, it sets firmly and evenly on the floor or ground. The frame is made from Northern Hardwood, attractively varnished and reinforced at its joints with steel brackets. Nickered patented fasteners are used.

DIMENSIONS

Opened: 35 inches x 21 inches x 27 inches high.

Folded: 36 inches x 6½ inches x 6 inches.
Weight: about 12¼ pounds.

Packed and Shipped in Individual Cartons.

No. 7

Leatherette Roll-Top Folding Table

(PATENT NO. 1416048, MAY 16, 1922)

This is the most practical Roll-Top folding table made. The slats are of thoroughly seasoned Northern Hardwood and securely sewed in between a fine leatherette top and a canvas duck bottom.

The frame is attractively varnished and very sturdy. It stands rigidly and evenly. As shown in the illustration, the leg braces are attached to the top by nickered patented fasteners. The corners of the top are reinforced with enameled brackets of open-hearth steel. This table makes a small and convenient bundle when rolled up.

DIMENSIONS

Opened: 29 inches x 30 inches x 27½ inches high.

Folded: 3½ inches x 7 inches x 30 inches.
Weight: about 11½ pounds.

Packed and Shipped in Individual Cartons.
